

## CLUB ENERJI PRINCIPALS AND MENTORS MEET 2012

The Meet was organized on 27 th September 2012 at the Bombay House. Nearly 100 schools were invited for the Meet, out of which 60 schools had either the Principal or the Mentor or both attending the Meet. In all, 80 school representatives attended the Meet this year.

Dr. Yogendra Saxena, Chief Sustainability Officer, Tata Power welcomed the gathering, highlighted the need for conserving energy and resources. He also thanked the schools for their constant support.

Dr. Avinash Patkar – Head – Chief – Clean Technology and Applied R&D and also a mentoring figure for Club Enerji for the last 5 years reiterated the need of conservation and increasing the scope of learning via Club Enerji.

This was followed by an AV depicting the work done by Club Enerji in the previous year with a special focus on the role of children in spreading awareness about conservation of energy and natural resources. Ms. Shalini Singh, Head – Corporate Communications, then made a presentation on the role of Club Enerji, it's achievements and the way forward. She also highlighted the targets set for the current year in terms of energy and resource conservation. She then unveiled the first look of the Civic & Moral Values programme that will soon be a part of in-class sessions of Club Enerji.

The Civic & Moral values module – an animated story of 3 children was shown to the Principals and Mentors for suggestions and feedback

This was followed up with the various recognition for National NESS Award; Best Energy Mentors, Best Mini Clubs, Highest Energy Savers - Energy Champions and the Best Educators (List of Winners mentioned below).

The forum was opened for a Q& A session, which had very enthusiastic response with many of the principals & mentors sharing their experiences and initiatives taken by them for conserving energy. The forum also addressed doubts and suggested initiatives for improving the program. Some of the suggestions received were activities like live demonstrations to teach children how to make compost from the waste at home. Appreciation of innovative ideas and support in implementing the ideas for any NESS member by Club Enerji came out as an important point. Educating housewives and families of children by conducting sensitization seminars, skits and plays by children, etc. were new ideas thrown up during the brainstorming.

To end the meeting representatives of all 60 old schools present at the Meet, where felicitated with the memento for participation, which provided a photo opportunity.
