

# Energy Busters

## To-do List

- Always keep AC at 26°.
- Switch off appliances from the plug point when not in use.
- Banish the monitor screensavers and sleep modes, rather switch off the monitors when not in use.
- Choose personal lighting of lower wattage instead of common lighting of higher wattage.
- Effectively use electricity between 10 AM to 8 PM.
- Forget not to switch off AC and lights before you leave
